*More important  
than the promise...*  
**ABILITY to perform**

To achieve and hold leadership for nearly a century in the manufacture of a single product requires more than promises—it demands ability to perform. Since starting the production of EMPIRE Bolts, Nuts and Rivets in 1845, R B & W has adhered strictly to policies of highest quality and strictest standards; and to progressiveness in manufacturing methods and processes, in management policies, trade relations, and customer service.

Today, with three strategically located manufacturing plants, R B & W maintains adequate stocks of EMPIRE Bolts, Nuts and Rivets—with reserves of large widely distributed warehouse stocks that assure prompt delivery of any order regardless of size.

# BETTER WIRE SCREEN CLOTH

*with*  
**Multi-Strand Printed and Measured Selvage**

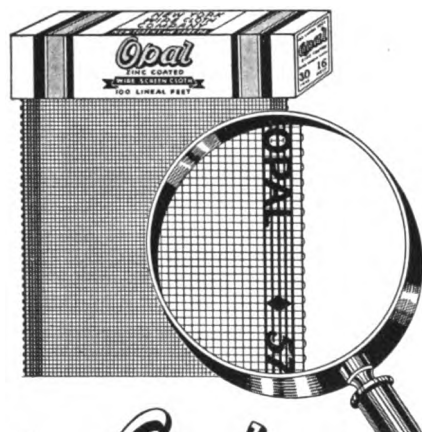

This new and distinctive improvement of the selvage of Wire Screen Cloth has greatly enhanced the value of these two popular and favorably known Brands.

The Brand Name and Trade-Mark are printed on every foot and serve as a positive identification and an assurance to both dispenser and

consumer of the highest quality of material and workmanship.

The printed foot numerals provide a most accurate inventory of the remaining contents of a roll and obviate any necessity of unrolling.

The Multi-Strand Selvage also adds greater strength and rigidity to the entire fabric.

## TRIPLE-LOCK LEAD-SEAL ROOFING NAILS

The original Deniston Lead-Seal Nail. Lead under the head and down the shank to plug the hole around the nail with lead. The "bump" triple-locks nail, lead and sheet together. Made with Drive-screw, Straight or Ringed Shanks, in Bright or Hot-Galvanized finish, or in Pure Copper.

## THE NEW "DENCO" LEAD-HEAD ROOFING NAIL

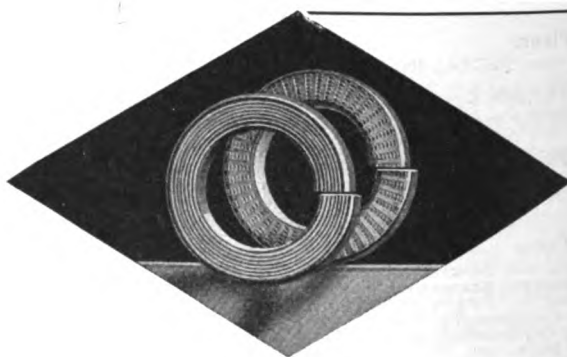

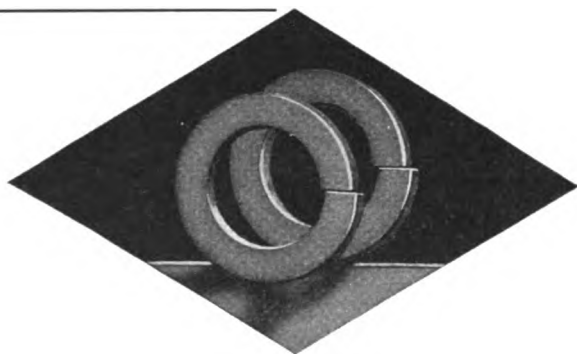

Manufactured by a new process in which the lead is compressed cold both over and under the steel head of the nail as well as down the shank, thus insuring a tight head that will always stay on the nail. Made with Straight or Ringed Shanks, in Bright or Hot-Galvanized finish.

## PLAIN DRIVE-SCREW ROOFING NAILS

A better nail of this type, with deep, well-cut screw-threads, clean sharp edges, and full-gauge shanks. Heads are large, strong, full size and well formed. Made in 10, 11 and 11 1/2 gauges, in various lengths from 3/4 inch to 2 inches.

# 1840 Russell Jennings AUGER BITS 1940

## EXTENSION LIP AUGER BITS

**No. 100—STANDARD POINT**

Screw point has a double thread—our standard for hand brace use for many years. This bit bores easily and cuts a smooth hole and is recommended for general use. Especially favored by cabinet makers, who require accuracy and easy boring in all woods.

**No. 101—QUICK BORING POINT**

This bit is exactly like No. 100, except that the screw point has a coarse single thread, which enables the operator to bore faster than he could with a double threaded point. This bit is very effective in gummy wood, as the thread will not clog.

Mid-States has a gate to fit any need—price—description or size. The line is headed by the greatest and most-talked-of Giant Never Sag All Steel Farm Gate, which, with its double frame and trussed steel construction, is built like a Cantilever bridge.

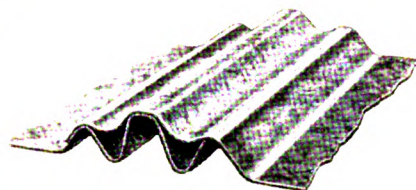

### NAILS and STAPLES

Mid-States Nails and Staples are made of Copper-Bearing Steel wire . . . uniform and well pointed . . . heads properly centered so they will not break off in use. The line includes all sizes and weights . . . common, finishing, casing, box, fine, fence, bright oval head clinch, slating, shingle, barbed and large head roofing . . . also a line of cement coated nails. Fence staples produced in both polished and "Galvannealed."

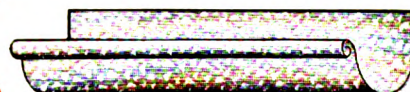

### SHEET METAL

Look into the Mid-States proposition . . . Here, you'll find corrugated roofing, crimp roofing—not those old outdated styles, but a new line that builders and contractors have helped design.

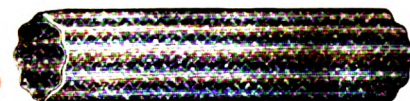

### EAVES

All made from best grade steel sheets—offered in five different styles.

### CONDUCTOR PIPE

In plain round or square corrugated style—will fit all standard make elbows—packed 250 feet to the crate.

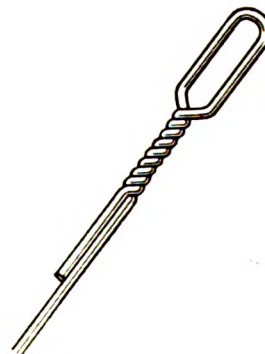

### BALE TIES

Made with a long loop, they thread into the baling machine quickly and easily. Every tie perfect and true to gauge. End of wire forming loop lies close to the shank and makes a smooth wrap. These ties are made of Copper-Bearing Steel, lead annealed by a special process which gives them added tensile strength.

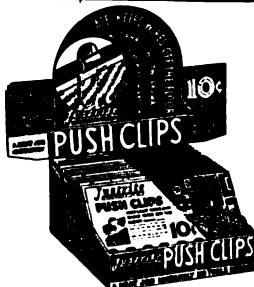

Tough in texture, they are pliable and work easily. Packed in tight bundles of 250. Standard lengths and gauges.

Packed in tight "Diamond Wrapped" bundles of 250 ties. Standard lengths and gauges.

ALL THE ADVANTAGES OF HIGH-SPEED CUTTING AND NONE OF THE HAZARDS . . . WHAT A HACKSAW BLADE!

**ELIMINATE  
WASTE  
THROUGH BREAKAGE  
AND SAVE UP TO  
30%**

## FLEXIBLE REZISTOR

Special-Alloy High-Speed Steel Hacksaw Blade

## WON'T BREAK IN A FRAME

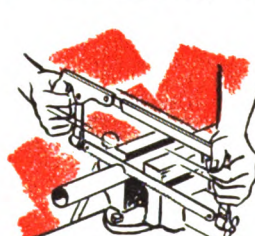

### NO MORE BREAKAGE

The Flexible REZISTOR is made entirely of special-alloy, high-speed steel, but only the cutting edge is hardened. That is why the Flexible REZISTOR stands up under conditions that result in breakage as high as 4 out of 12 brittle, all-hard blades in the average shop.

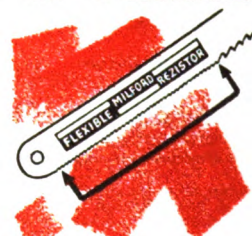

### ONE BLADE FOR EVERY TRADE

Every sawing operation in the plant can now have the advantage of high-speed cutting. Bench workers, maintenance men, electricians, plumbers, garage mechanics, toolmakers and unskilled workers can use Flexible REZISTOR without waste of blades or time.

### CUTS FASTER— SAVES TIME

With the Flexible REZISTOR cutting can be speeded up in the toughest materials such as stainless steel and bronze. Bear down all you like and take full advantage of the free-cutting REZISTOR high-speed steel.

### EASY-STARTING TEETH

With these fine milled teeth at the forward end of the blade, the cut can be started with ease at any angle, under any cutting condition, and smooth action and a full stroke is the result. All Milford hand blades have Easy-Starting Teeth—an exclusive Milford feature.

# Western HAS THE FEATURES

SUPER-X and XPERT both stand for outstanding improvements in shot shell, rim fire and center-fire cartridges. That is why hunters *expect* WESTERN to be on your shelves. Wild-fowl hunters know the value of the longer range of SUPER-X shot shells. Upland hunters insist on the hard-hitting uniform

## SHOT SHELLS

### Super-X and Xpert

## SHOT SHELLS

You've talked with duck hunters and heard them praise the SUPER-X load sky high. It's because they've learned how SUPER-X pulls 'em down clean at remarkable distances. SUPER-X Short Shot String is an outstanding improvement that makes SUPER-X sell—and sell!

Western XPERT shot shells, with controlled shot string, mean just as much to quail and rabbit hunters. They hit hard and function perfectly. The close, even patterns get game. The dependable uniformity of the XPERT shell is an important feature that brings your customers back for more!

## .22 CARTRIDGES

### Super-X and Xpert

## .22 CARTRIDGES

Western SUPER-X .22's have the power that lays out pests for good. Long range—high velocity—flat trajectory—and Lubaloy bullets in which the lead is exactly the right degree of softness for real effectiveness, are features every shooter appreciates. SUPER-X with hollow-point bullets give maximum mushrooming. The cartridges are smokeless—non-corrosive. CLEAN!

XPERT .22's get the call for all-purpose shooting. Their extreme accuracy makes customers call for them OFTEN. And who wouldn't, especially when they cost no more than ordinary .22's? And they're smokeless—non-corrosive. Both XPERT and SUPER-X are made in .22 Long Rifle, .22 Long and .22 Short sizes.

**Western**

**WORLD CHAMPION AMMUNITION**

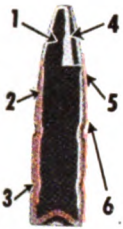

# THAT BOOST AMMUNITION SALES

XPERT shot shell. Big game hunters, pest and small game enthusiasts are certain of maximum power and long range effectiveness when they use SUPER-X cartridges. For all-around .22 shooting XPERT gets the call.

## CENTER-FIRES

### New **Super-X** SILVERTIP EXPANDING BULLET

1. Soft lead core protected by "nickel silver" jacket. No more battered points.
2. Tough outer jacket of Lubaloy encases both lead core and "nickel silver" jacket.
3. Special knurls bind together lead core, silver colored jacket and outer jacket.
4. Jacket of "nickel silver" completely encloses lead core at the bullet's tip.
5. Expansion of the bullet is delayed while silver colored jacket is rolled back here.
6. Ultimate expansion regulated by curling of edge of outer Lubaloy jacket.

The SILVERTIP is the new bullet big-game hunters are talking so much about—because it combines controlled, delayed expansion with deep penetration—mushrooms effectively at ALL hunting ranges. Both the *rapidity* and *extent* of expansion are controlled. A thin jacket of "nickel silver," composed of copper, nickel and zinc, encloses the soft lead core and delays expansion while the bullet pierces hide and tough muscle tissue. On reaching the vital organs the SILVERTIP expands rapidly, unleashing its tremendous power in the body cavity, where most effective. There are 18 SUPER-X cartridges, available in 15 popular calibers.

## CENTER-FIRES

### **Super-X** Rifle and Pistol CENTER-FIRES

There are SUPER-X center-fire cartridges to meet the demands of every big game hunter. SUPER-X Soft point or Open point expanding center-fires give your customers the knockout power, maximum velocity and accuracy they want for *their* particular rifles. They are available in a complete range of calibers, from the smallest to the largest. The WESTERN line of pistol cartridges is also complete. SUPER-X Metal-Piercing ammunition has the disabling power police prefer. It pays to go after the police business in your locality. Remember: the name WESTERN stands for World Champion Accuracy in ammunition!

# BIG NAMES

## DOUBLE X

The leader of them all, the one-and-only Double X; the white magic that's double action; that makes varnish vanish and makes old floors new. The product that, through 10 years of national advertising, has taught America to "do over" its own floors.

## SAVABRUSH

The presto-powder that [when dissolved] restores life and health to crippled paint brushes overnight! Not only the original brush-restorer but the only one that has been nationally advertised for years. Result? National brand-demand!

## SCHALK'S CRACK FILLER

The package that's the talk of the trade; product destined to outsmart and outsell any Crack Filler ever offered. It's got everything.

## WAXOFF

Not only a great de-waxer but a great insurance policy against that chronic complaint "The varnish didn't dry." Every time you sell varnish or wax, sell Waxoff. You make extra profit; and you save yourself an extra headache. Because the varnish is sure to do it.

## WARNER ACCURACY TOOLS—For Painters, Paperhangers and Other Good Workmen

### The Warner FLOOR SCRAPER

A rugged tool with a real "bite." The curved blade is double edged so that when one edge becomes worn it may be reversed. It is also adjustable and as wear takes place from re-sharpening it may be moved forward by merely loosening the clamping screw which holds the curved steel reinforcing plate firmly against the cutting blade. This plate insures firm, even pressure and prevents chattering. Tool sides are bevelled for close-in work, and handles are shaped to afford a good grip.

All-Steel Welded Putty Knife.

Semi-stiff,  $1\frac{1}{2}$ " wide. Nothing to loosen up, split or break. Comfortable handle.

All-Steel Welded Wall Scraper.

Semi-stiff, 3" wide. Designed for heavy duty. Cannot loosen up or break.

### Line Chalking Reel

An improved line chalker easy to open for refilling with chalk. Reel positively centered because shaft passes through both sides of case. Supplied with fifty feet of line and chalk in case.

### The Warner PATCHER

Made of cutlery steel, oil-hardened and tempered to extreme toughness. A high-grade tool, filling a long felt need for something of its all around handy nature. Its combined square and trowel pointed blades, offset from the handle, are fine for running joints and other plaster patching jobs.

Carry it in your pocket without danger. When the blade is needed a light push with the thumb instantly unlocks and puts it in working position. No screws or nuts to loosen or tighten and no need to touch the blade, which may be replaced quickly by sliding it out.

## REPUBLIC WIRE FENCING AND POSTS

Republic Woven Wire Fence is tough and strong—made of heavily galvanized, full-gauge, copper-bearing steel wire. Properly erected, it provides a tight, non-sagging fence that resists rust and defies time. It is made in a wide variety of styles and sizes. Republic Barbed Wire is equally tough and strong with long, sharp barbs firmly secured to cables on uniform spacing. Republic Fence Posts—including the popular Studded "Y" and channel styles—are made of high strength rail carbon steel—tough, strong and durable. Republic Bale Ties have just the right combination of ductility for easy tying and strength to withstand heaviest strains.

## REPUBLIC WIRE NAILS AND STAPLES

Made from specially processed steel wire, Republic Wire Nails are uniform in all respects. Their high strength, sharp points and full-formed heads make them easy to drive—in fact, all Republic Nails are made to the exacting specifications required for machine nailing. Every keg is plainly marked with size and type of nail—and is free from half nails, unpointed nails, headless nails and bent nails. You can sell every pound you buy—because of this freedom from imperfect pieces. Styles include all common, finishing, box, roofing and other commonly used types—also spikes and staples.

## REPUBLIC UPSON QUALITY BOLTS AND NUTS

The Republic Upson Quality Line of Headed and Threaded Products consists of more than 20,000 items—every one of the same uniform quality that has made the name UPSON famous throughout industry and the hardware trade for more than 85 years. Heads are full—shanks are tough and strong. Threads are clean, sharp and free-running. Nuts fit accurately and easily—because they're precision-made, and because every bolt and nut is hand-inspected before shipment. Republic Upson Quality Bolts are clean and are packed in clean, plainly labeled packages. You'll find every type your customers need in this complete line.

## STAINLESS STEEL UTENSILS OF REPUBLIC ENDURO

The wonder metal of the 20th Century—Republic Enduro\* Stainless Steel—now is available in a number of lines of cooking utensils that are as beautiful and eye-appealing in design as this lustrous metal. More and more housewives every day are turning to utensils made of Enduro. They like its gleaming beauty, its cleanliness and sanitation, its ease of cleaning, its immunity to food and fruit juices and its resistance to abuse. Enduro is solid stainless steel—with nothing to wear off. It cleans easily with soap and water—doesn't require constant scouring, scrubbing and polishing. It preserves natural food tastes—stays lustrous for life. Let us send you names of manufacturers who make utensils of Enduro.

# THE BOSTON WOVEN HOSE AND RUBBER COMPANY

*has served the Hardware Trade for 63 years*

Established in 1878, this company has consistently kept in the front line as one of the country's leading manufacturers of Garden Hose, Spray Nozzles, Fruit Jar Rubbers, Friction Tape, Belting, Industrial Hose for every purpose, and miscellaneous mechanical rubber goods.

**Consult the following pages for detailed description of the BWH line of fast-selling leaders for the Hardware Trade.**

# B.W.H. GARDEN HOSE *Sensational Value*

A complete line of garden hose with everything you need — the right quality, the right price, and the right merchandising set-up. It consists of *four quick-selling brands* each designed to be a leader in its class, and to fill a definite garden-hose demand. The line is competitive in price, and you pay no more for the aggressive sale stimulation we give it, for its higher standards of material and manufacture, or for the increased customer satisfaction that it brings. Stock and sell these four B.W.H. leaders. They mean a better, easier business at a bigger profit.

## BULL DOG 2-Braid

• NONE BETTER MADE

The most durable, most serviceable, most unchallengeable garden hose that you can sell, or that your customer can buy. Superlative in material and construction. Has broad, rugged corrugations, and in color is a rich, warm, individual brown.

## VIGILANT 2-Braid

• SUPREME IN ITS GRADE

In the first class, and next highest to Bull Dog for quality in every detail. At the head of the class for selling power. VIGILANT appeals to home-owners who want a real hose at the right price.

## VIXEN 1-Braid

• FOR THE POPULAR TRADE

At a popular price, and more than a popular hose, because it gives far more for the price, like every leader in this fast-moving, money-making line; and because it is more than satisfactory at its price in quality and service.

## TIGER 1-Braid

• FOR THE PRICE PARADE

Looking for value? TIGER has it, and notably when they talk price. So notably that it will outsell any "all rubber" garden hose made to offer at a price. For in TIGER, only the price is competitive — the value is above competition.

All B.W.H. garden hose is equipped with heavy cast brass, nickel plated couplings made in our own plant.

# BOSTON WOVEN HOSE

*Package. Price. Profit*

## BULL DOG 2-Braid

Bull Dog Cord hose is packed two ways—in the new, smart cartons and in shipping containers or in the standard package with each 25- or 50-ft. length paper-wrapped in bales containing five 25- or five 50-ft. lengths.

## VIGILANT 2-Braid

Vigilant hose also comes in two styles of packaging—25- or 50-ft. lengths either paper-wrapped or cartoned. The cartons are shipped in cases containing five 50- or ten 25-ft. lengths.

## VIXEN 1-Braid

The paper-wrapped lengths of 25- or 50-ft. are shipped in bales holding five of either length. The hose in cartons comes in shipping cases containing five 50-ft. lengths or ten 25-ft. lengths.

## TIGER 1-Braid

Shipped in paper-wrapped bales containing five 25-ft. or five 50-ft. lengths.

## B.W.H. GARDEN HOSE FITTINGS

continue to offer you increased profits on garden hose sales. Concentrate on the well known brands in this famous line of Garden Hose and Fittings.

## NEW "COME-BUY" DISPLAY

Be sure to feature this display for the Boston Nozzle for 1940.

## BOSTON NOZZLE

The standard spray nozzle of the American market. Delivers more water in less time than ordinary nozzles. Complete shut-off. Sizes —  $\frac{3}{4}$ ", 1".

## ECLIPSE NOZZLE

Built along lines similar to the famous Boston Nozzle but lighter in type and lower in price.

## Challenge NOZZLE

A new member of the B.W.H. family. Standard nozzle construction with a barrel of modernistic pattern.

**& RUBBER COMPANY BOSTON MASS.**

# GOOD LUCK *and* BULL DOG Jar Rubbers

All Good Luck and Bull Dog jar rubbers are packed in full color display containers holding two dozen cartons, a genuine silent salesman for the retail store.

No housewife who stands over a steaming kettle on a hot summer afternoon to can her fruits and vegetables is interested in cheap jar rubbers. She is in no mood to consider a saving of a penny or two on a dozen jars of preserves when she is putting dollars into those same jars in food product, fuel and labor.

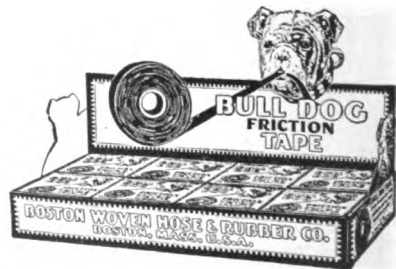

Good Luck rubbers, at less than a penny a jar (10c a dozen), are the cheapest insurance any home canner can buy.

**BULL DOG JAR RUBBERS** come red or white, single or double lip. One pull on the large, handy lip and the jar is open.

**BULL DOG JAR RUBBERS** are packed in an attractive carton. Twenty-four of these cartons are packed in a display container as shown above. A Bull Dog shipping case contains 12 gross or 6 display containers. Shipping weight 31 lbs.

## BULL DOG *Friction Tape*

**BULL DOG** friction tape not only sticks, but sticks fast, lies smooth and holds tightly. It is a splendid insulator. It keeps out water and has high dielectric strength. **BULL DOG** stays fresh in the roll and remains "tacky" and alive because there is plenty of live rubber in it.

# All INTERNATIONALS Are All-Truck TRUCKS

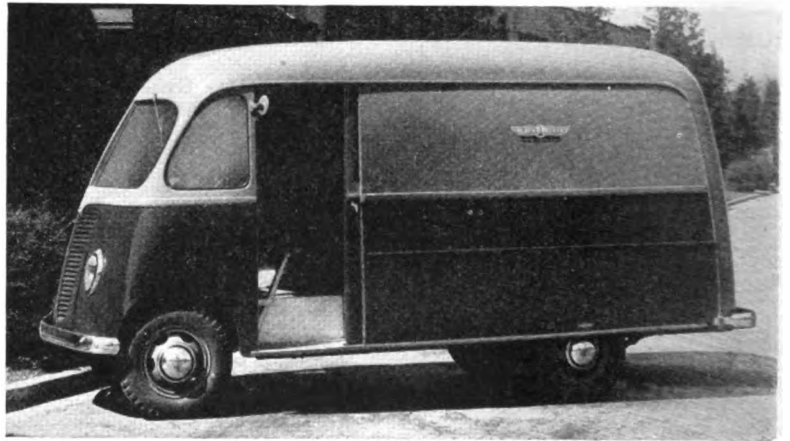

An outstanding popular truck is the International Cab-Over-Engine Model D-300 with its ideal 1/3-2/3 load distribution. Unusual maneuverability saves time between stops in city hauling. The comfortable cab provides easy riding, wide-angle vision, and maximum safety.

IN OUR modern truck factories, we deal with truck needs and *truck needs only!* Every International is a *truck* from one end to the other. It is powered by a *truck* engine, designed and built to stand up under *truck* operating conditions. The extra value built into *all-truck* Internationals as a result of this policy has made International reputation and prestige.

When you choose a truck — whether you need a heavy-duty model or one for light-duty work, consider this extra value. You wouldn't hire a sissie to dig a ditch. You'd get a two-fisted he-man who could stand the gaff. The same goes for trucks.

A phone call to the nearest International Truck dealer or Company-owned branch will bring full details concerning International Trucks for your business. The line ranges from 1/2-ton units to powerful Six-Wheelers.

Beauty, utility, economy, easy handling, driver comfort, and safety are among the many features that put International Trucks with All-Steel Metro Bodies far ahead of the field. They have double the cubic capacity of the standard panel body on the same wheelbase length. Available in two models—1/2-ton chassis and 3/4 to 1-ton chassis.

## The Arched “METAL-GRIP” Keeps All The Teeth On The Ground

In the McGuire Bamboo Lawn Rake the “METAL-GRIP” is **ARCHED**. When this rake is held at a normal angle all the teeth are kept on the ground. Every tooth does its share of the work—the user derives the use of the entire width of the rake without exerting pressure. The **SPIRAL**, (another exclusive feature), links all the teeth together, but permits their free **FLEXIBLE** movement with minimum possibility of breakage.

### McGuire's No. 1 Bamboo Lawn Rake

is made **extra strong** to give long satisfactory service. The firmly secured wooden handle is practically split proof. It is beautifully polished. Three sizes: 18", 24" and 30". Made in America by skilled American labor. Also a popular line of ordinary bamboo rakes to retail at competitive prices. Send for Literature and Discounts.

# This Tag says "IT'S CYCLONE"

*—and it helps build sales!*

WHEN a customer sees a product with a brand name he doesn't know, he hesitates. Sometimes he doesn't buy. So it pays to give quick, sure proof that you handle well-known trade-marked goods. When you sell lawn fence and gates, burner baskets, hardware cloth and screen cloth—point to the U-S-S Cyclone "Red Tag." Long-continued advertising has made the Cyclone name a sign of quality. It tells your customers that they'll get their money's worth—helps them make up their minds to buy. Order Cyclone "Red Tag" Products from your jobber. And ask him for attractive Cyclone display material to help you sell. It's free.

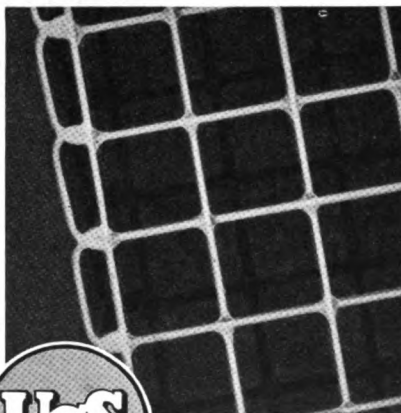

## LAWN FENCE AND GATES

—You can satisfy almost any customer with Cyclone Lawn Fence. For it comes in welded and woven styles, in two designs of fabric, with gates to match. There's a wide variety of heights and weights, too. Every foot of it is carefully made, sturdily constructed—and the heavy galvanizing resists rust.

## HARDWARE CLOTH

—In a glance, your customers can see the trimness of Cyclone's new Welded Selvage—uniformity of the mesh—the straightness of the wires—the brightness of the galvanizing. They can see that this new hardware cloth will make better-looking screens, guards, poultry floors—help them make a neater, stronger job for whatever purpose they are buying it.

## SCREEN CLOTH

—Carpenters and other people who use a lot of screen cloth can tell you that the even mesh of Cyclone Screen Cloth is plenty important. For this carefully woven cloth cuts square—stretches tight and straight. Cyclone Screen Cloth comes in a strong fabric carton that exactly fits the roll and protects it from damage. Each roll bears an inventory card that simplifies inventory taking.

## BURNER BASKETS

—These tough, rugged baskets are sure-fire sellers. They're made with strong wire, welded at intersection sections. Available in 1¼, 2 and 2½ bushel capacities. The 2½ bushel size is available in the new Flex-Top style. For especially rough service, Cyclone Catch-All Basket is recommended—with extra-heavy wires, reinforced with pressed steel rims top and bottom.

# Salute the world's worst soldier...

## ...he's bringing in Bissell sales to YOU!

**PAPER HAT AND ALL**, this soldier's going to make about twenty million ladies jump to attention!

At least they will if they run true to form. Because he's the main character in one of Bissell's famous ads, and these ads are read by five times as many women as the average ads... in magazines that go to twenty million homes the country over!

These advertisements with their hard-hammering, hard-selling messages on Bissell Carpet Sweepers are important reasons why women come to your store and ask you for Bissells! And make no mistake about it, *more women ask for Bissell Carpet Sweepers than they do all other sweepers combined!*

Are you getting the most you can out of the powerful sales support behind Bissell Carpet Sweepers? The name Bissell has been foremost in the sweeper business since 1876—and Bissell's aggressive advertising keeps it there! Take advantage of this for your own profit. Display Bissell Sweepers prominently, in your windows, inside your store!

Have your salespeople demonstrate Bissells and talk them up! You'll find that if you push Bissells—feature them—you'll make a grand clean-up on your sweeper sales!

(From survey figures, over a five-year period.)

# NOW You Can KNOW Your BUILDERS' HARDWARE

Complete from A to IZZARD

A. H. BROWNELL'S HARDWARE AGE SERIES  
COMPLETE IN ONE VOLUME . . . A BIG  
\$3.00'S WORTH FOR YOU AND YOUR MEN.

**BELONGS  
in Your FILES**

There are about 10 ways a hardware man can use **HARDWARE AGE'S Builders Hardware Text Book** . . . You can keep it in your reference files for immediate, authoritative information . . . you can take it home at nights and study its Elementary, Intermediate or Advanced Courses . . . or you can give it to that smart, young clerk you are training to handle Builders' Hardware to study at home, to name three ways to use it.

A lot of so-called Text Books say they are complete, but when you get them you find important information missing. Here is a Text Book which is complete. It's written by a man who knows his subject backwards, forwards and sideways, selling and buying Builders' Hardware, who has the ability to tell what to do and what not to do in an interesting way . . . The comparative Charts on

Finishes; Door Butts, Jambes; Mortise Bit Key Locks and Latches; Trim for Mortise Locks; Surface Door Closers and many others are worth the price alone.

When the news got around that we were putting Hardware Age's "Taking the Mystery out of Builders' Hardware" articles in one fat volume . . . orders began coming in steadily for this complete study.

You need at least one copy of this Text Book, maybe more. Use the coupon below and have a copy where it will do you the most good and make you the most money, in your store. It's attractively printed, well illustrated to show to customers, and sturdily bound to last for years of heavy usage. Your copy is waiting.

**ALL THE REALLY IMPORTANT  
THINGS and MORE, in this VOLUME.**

# NEW COUNTER DISPLAY MAKES G-E BULBS SELL THEMSELVES!

**HERE'S THE WAY** to set up a proved, pre-tested counter display that makes General Electric MAZDA lamps *easier to sell* than ever:

1. Line the bottom of the bins with white paper, cardboard or oilcloth to make the bulbs appear whiter and cleaner.
2. Use higher glass at each end of the counter for feature bins of popular sized bulbs.
3. Display bulbs in bulk with identifying price cards at back . . . carrying both price and brand identification.
4. Slide transfers back of glass and front

of feature bins. Insert flattened out lamp wrappers back of glass fronts of lower bin section. Place a few bulbs in wrappers on top of bulk display. Insert 11" x 14" card in one feature bin card holder and a copy of the current G-E magazine ad in the other feature bin holder.

5. G. E.'s lighted Double Duty Demonstrator makes an attention-attracting feature for the counter and permits quick testing of bulbs.

6. Enterprising dealers who thoroughly familiarize themselves with the G-E Light Conditioning Guide are using it to

advantage by displaying it in the front center of the display counter. They are using it to interest customers in buying the right size bulbs. It helps sell more bulbs, and higher priced bulbs.

**ADDED SALES HELPS.** Use Spotlights or special counter lighting fixtures to make your bulb counter bright and attractive. Try using flashing bulbs on extension cords under your bulk lamp display . . . especially in the feature ends.

For further selling ideas for G-E bulbs, see your G-E jobber's salesman or write General Electric Co., Dept. 166-HA-G, Nela Park, Cleveland, Ohio.

## 5 reasons why it pays to sell

## G-E MAZDA LAMPS GENERAL ELECTRIC

**1 NATIONALLY ADVERTISED** in 20 leading magazines with millions of G-E messages.

**2 ON THE AIR** "The G-E MAZDA Lamp Hour of Charm", Sundays at 10 P.M. (EST) N.B.C. Red Network.

**3 KNOCK-OUT DISPLAYS** G.E. offers its agents a series of striking, colorful window displays.

**4 SELLING TOOLS** Counter display material, bulb holders, other material available.

**5 ASSURED PROFITS** More people buy G-E MAZDA lamps than any other brand.

# SAFETY FUSE

THE ENSIGN-BICKFORD COMPANY, SIMSBURY, CONN., U. S. A.

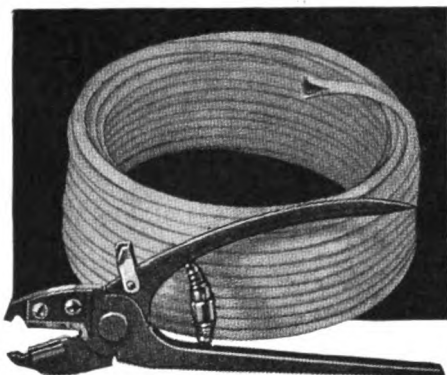

Established 1836. Original manufacturers of safety fuse for blasting. Products noted for uniform quality. Also makers of Cordeau-Bickford and Primacord-Bickford Detonating Fuse, widely used in quarries and demolition work.

Two typical 50 ft. coils of Ensign-Bickford Safety Fuse. Each coil is wrapped in paper bearing the trade-mark and brand name.

Typical wooden case containing 6,000 ft. and fibre cartons containing 3,000 ft. and 1,000 ft. respectively.

Fuse Cutter and Cap Crimper tool. Notice the slit end in the fuse formed with this tool.

To remove the required length from a coil, draw the inside end through the coil. This method will avoid the tendency to recoil or kink and will leave the remainder of the coil undisturbed.

## SAFETY FUSE

### BRANDS:

**SINGLE TAPE:** For use in damp work.

**DOUBLE TAPE:** For use in wet work.

**CLOVER BRAND:** General purpose fuse, for use in wet work.

**BEAVER BRAND:** For use in damp work.

**BLACK WAX CHARTER OAK BRAND:** For use in wet work; a very good general purpose fuse.

### FOR AGRICULTURAL PURPOSES

**GRAY CHARTER OAK BRAND:** For use in very wet work; this fuse combines a high degree of flexibility with excellent waterproof qualities. It will meet all the requirements of agricultural blasting, quarrying or mining.

### FOR MINING PURPOSES

**CRESCENT BRAND:** For use in very wet work; this is one of our standard mining fuses taped and double countered.

**CLOVER BRAND—White or Orange Wax Finish:** For use in very wet work or where considerable water pressure is encountered. The volume of smoke given off when burning is appreciably less than on the other brands. Clover Brand is not easily affected by extreme climatic changes or long storage.

*Particular attention given to fuses to meet special requirements.*

Quotations Furnished on Application

## HOW PACKAGED

Safety Fuse is coiled in 50 ft. lengths, and two coils are nested together to form packages of 100 ft. each. These packages are packed in standard boxes made of fibre, clearly marked as to brand and quantity for convenience in storage.

The cases shown at the left are the 6,000 foot wooden case, 3,000 foot fibre and 1,000 foot fibre. Fuse is put up on metal reels, 3,000 feet to a reel. For export, 3,000 feet are put up on a fibre core and packed in a metal drum.

## ACCESSORIES

### FUSE CUTTER AND CAP CRIMPER

Combines in one tool (1) fuse cutter with removable blade, cuts fuse squarely across; (2) fuse splitter; (3) broad jaw crimper; (4) wire cutter; (5) powder punch; (6) screw driver. Size of ordinary pliers.

### CARTRIDGE CENTER PUNCH

Insures correct placing of the center hole and the location of the capped fuse where it will be most effective. For cartridges 1, 1 1/4, 1 1/2, 1 3/4 inch diameter.

### SAFETY FUSE BENCH CUTTER

Screws to end of bench or service box. Cuts fuse clean and square.

### HOT WIRE FUSE LIGHTER

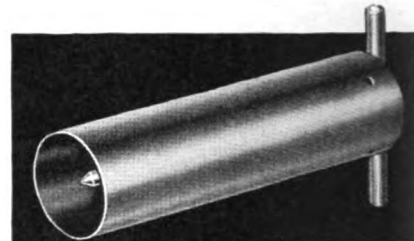

Wire covered with composition that burns with intensely hot ring of fire. Ignites square cut fuse instantly.

### SAFETY FUSE MATCH LIGHTER

Short paper tube with match head end. Slips over freshly cut fuse and ignites from safety match box or open flame.

### PULL WIRE FUSE LIGHTER

Slip over freshly cut fuse and pull wire. Confines flash and end spit of the fuse.

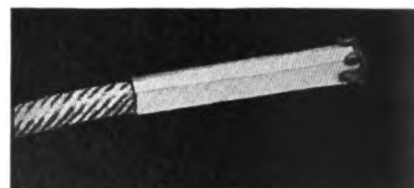

Cartridge Center Punch made of brass for 1, 1 1/4, and 1 1/2-inch cartridges.

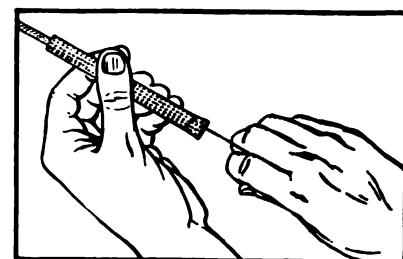

Safety Fuse Bench Cutter. A sharp, clean cut, squarely across the fuse.

Hot Wire Fuse Lighter in 12-inch and 7-inch lengths.

Safety Fuse Match Lighter in packages containing 100 each.

Pull Wire Fuse Lighter. By confining the flame and end spit within the tube this lighter offers added safety in underground blasting. A desirable accessory in any blasting work. A lighter, once used, cannot be used again.

# Sell ECONOMICAL LUBRICATION

Your customers want economical lubrication—not just cheap lubricants. Sell them Dixon's Graphited Lubricants—that stand up better—cutting power costs, maintenance costs, and cost-per-year of lubricant.

Dixon's Ticonderoga Flake Lubricating Graphite for cylinder and bearing lubrication, packings, gaskets, threaded joints, etc.

Particle Size No. 1—large, unctuous flakes.

Particle Size No. 2—

finely subdivided powdered flakes.

Dixon's Cup and Pressure Gun Graphited Grease—Insoluble in water, hence ideal for all outdoor as well as indoor machinery. Retains consistency at all temperatures. Lasts longer than plain grease. In six consistencies.

Dixon's L & P (Lubricating and Penetrating) Graphited Oil—Quick-Action rust solvent, rust preventive, and lubricant for general industrial, household and automotive use. In handy 3 oz. or pint squirt cans, or in large quantities.

## GRAPHITE is the Answer

Natural flake graphite, used alone, is the ideal lubricant for many applications. Mixed with oil or grease it provides lubricants of unsurpassed qualities—lubricants that will stand up where plain oils or greases squeeze out, wash out, or melt out.

Dixon's Solid Belt Dressing—handy, giant bar held against running belt reduces slip, lengthens belt life, will not harden or crack belt even after years of use.

Dixon's Pipe Joint Graphite Compound—tightly seals all flanged, gasketed and threaded joints against steam, gas, air, acid, alkalis, brine, and all aqueous solvents. Enables easy disassembling of joints years later.

# THE BARRETT COMPANY

2800 So. Sacramento Ave.  
Chicago, Illinois

40 Rector Street, New York, N. Y.

Birmingham  
Alabama

The Barrett line of roofings, insulation and protective products is complete and backed by a name that the public recognizes as a hallmark of quality and dependability. Powerful sales promotion material, attractive sales-building literature and comprehensive advertising in The Saturday Evening Post help build business for you.

## BARRETT ASPHALT SHINGLES AND SIDINGS

Eighty-six years of experience "Between the world and the weather" has taught The Barrett Company how to build the maximum durability, fire-safety, beauty and weather protection into asphalt shingles and sidings. They are available in a variety of shapes, sizes, weights and colors to meet every home-owner need.

## BARRETT ASBESTOS SHINGLES AND SIDINGS

Barrett Asbestos Shingles and Sidings combine long life and good looks. They're backed by "the greatest name in roofing," and measure up in every way to Barrett's high standards of performance and quality. There are styles, colors and weights for every requirement . . . at prices that suit the home-owner's purse.

## BARRETT ROLL ROOFINGS

All Barrett's splendid facilities—felt mills, refineries, factories, laboratories and manufacturing skill—contribute to the eminence of Barrett Roll Roofings. They include smooth-surfaced and mineral-surfaced rolls, headed by the famous Barrett Everlastic brands which enjoy consumer acceptance second to none. The mineral-surfaced types come in a variety of attractive colors, weights and grades to meet every purse and every purpose.

## BARRETT SHEATHINGS

Barrett-made sheathings and building papers are produced with the same painstaking care that enters into the manufacture of all Barrett products. Uniformity of quality is assured and they are accepted as standard everywhere. Various grades and weights are available.

## BARRETT PLASTIC ELASTIGUM

This justly famous plastic cement—"the cement of a hundred uses"—helps make and keep roofs leak-proof. It is made of asphalt mixed with long-fibre asbestos, and is tough, elastic and adheres tenaciously to metal, stone, wood, glazed brick and tile surfaces. Recommended for repairing gutters, vents, skylights, chimneys, etc.

Send for illustrated booklet describing these and other Barrett Products.

## BARRETT LIQUID ELASTIGUM

A durable, liquid roof coating containing asbestos fibre which is easily applied with brush or squeegee. It forms a tough, lasting coating that withstands temperature changes, closes cracks and small holes, and adds years of life to old roofs when properly applied. Sun will not blister it; it resists atmospheric acid and alkali fumes.

## BARRETT EVERJET PAINT

A high-grade, waterproof protective paint for metals and wood. It has a pitch base and produces a glossy, black elastic coating. It is produced under strict manufacturing control, and is a dependable, economical and durable product. Every building owner and farmer will find scores of profitable uses for this dependable rust preventive paint. It will deliver outstanding service.

## BARRETT ETERNIUM PAINT

A pitch-base paint specially developed to resist the action of acetic acid, dilute hydrochloric, nitric and sulphuric acids, and alkaline solutions. It brushes easily, dries quickly, forming a surface that is waterproof, elastic and tightly adhering.

## BARRETT HYDRONON PAINT

A pitch-base paint made especially for damp-proofing masonry walls, above or below ground. It is penetrating, black in color, and highly resistant to alkaline solutions which leach out of masonry. Hydranon is easily applied by brush or spray.

## BARRETT CARBOSOTA

A pure coal-tar creosote oil, specially processed and refined, which has proved its reliability by long years of use. All timbers for frame buildings, fence posts, gates, boardwalks, bridges, etc., when treated with Barrett Carbosota resist rot and give additional years of service. Heavy impregnation with Carbosota provides effective protection against termites and other wood-destroying insects as well as fungus growth.

## BARRETT CREONOID

An old reliable spray for eliminating lice and mites. Used in the stable, cow barn, chicken coop or hog pen, it increases the comfort of farm animals and enables them to feed, work or produce better. Barrett Creonoid is a money-making product for farmers as well as dealers.

## BARRETT CATTLE SPRAY

A scientifically processed non-staining, non-tainting cattle spray that is 100% insecticide. Barrett Cattle Spray is light in color and has a clean, pleasant odor. It does not deteriorate with age, and costs less than many less effective sprays. It's a good seller wherever displayed.

Gold Strand Cloth is produced in all standard grades and widths.

*Manufactured and distributed by American Wire Fabrics Corporation, subsidiary of Wickwire Spencer Steel Company.*

## HARDWARE CLOTH

### **WIRE PICTURE CORD**

The Wissco Trade Mark is an absolute guarantee of full length and full number of strands. The braiding is always smooth. Both finishes, tinned or gilt, are packed in boxes, or spooled in standard or special lengths.

### **HEX MESH NETTING**

Clinton Hexagonal Mesh Netting—frequently referred to as Poultry Netting is woven of cold drawn Wissco wire made from special steel stock, thus giving great tensile strength. Made Galvanized After and Galvanized Before weaving in all standard mesh and wire gauges, widths 12" to 72" inclusive.

### **STRAIGHT LINE POULTRY NETTING**

This Clinton Netting is of the parallel wire construction that permits easy stretching between posts. It does not sag. Produced in both Galvanized Before and Galvanized After grades, all standard mesh and wire gauges, widths 12" to 72", inclusive, and standard length rolls of 150 linear feet each.

### **CHAIN LINK FENCE**

This type of fence provides ideal protection for all kinds of properties—such as, homes, factories, water-works, playgrounds, hospitals. Wickwire Spencer Chain Link Fence is strong and long lived, because both the framework and netting are made of extra heavy sections of copper bearing steel, hot-dipped galvanized. Furnished to the hardware trade as netting only, as a complete fence, or delivered and erected. Three to ten feet in height, in all meshes and wire gauges.

### **SINGLE and DOUBLE GATES**

These are real gates, so sturdy yet attractive with their bright galvanizing they have real sales appeal. The rigid construction with electrically welded corners make the frame ONE PIECE. Hinges for pipe and wooden posts.

## Sell the Rope That's Proven Best for Farm Use

**I**MPARTIAL tests consistently prove that Amco "All-Weather" treated manila rope retains its high tensile strength and unusual flexibility longer under the rigors of farm work than any other similar rope. The special cordage solution used is practically impervious to sun and rain. Word of Amco's exceptional service spreads rapidly among rope users. That's why dealers who take on Amco "All-Weather" rope enjoy such worthwhile increases in their rope business.

For all its extra value Amco "All-Weather" manila rope weighs no more per foot nor costs no more per pound. Specify Amco on your next rope order.

Each ROTABIN section rotates, bringing the merchandise right to your finger tips. No time lost in looking for the correct size—no boxes to open—no sticking drawers to pull out—no more running back and forth from bin to bin. ROTABIN saves hardware dealers, time, steps, labor and money and makes storage space pay a profit the year around.

# The only heater in America with Synco-Matic Mechanical Draft!

MODEL 1213 SUPER

MODEL 1210 SUPER

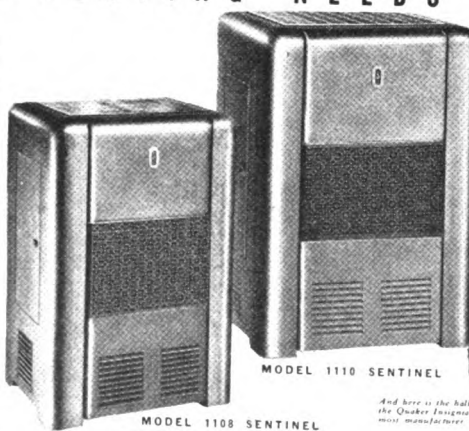

**QUAKER BURNOIL SUPER SERIES.** Here is tomorrow's heater—TODAY! A heater that is absolutely independent of the chimney except as a vent . . . a heater that supplies both oil and air to the burner in scientifically determined proportions . . . a heater that assures the lowest operating costs ever obtained with ANY oil-burning space heater! It will deliver full capacity in any installation—will perfectly fulfill its task of heating where no other heater could begin to perform! Exclusive, patented Quaker Synco-Matic Mechanical Draft makes this performance possible—but this is only one feature. T-shaped Heating Drum provides 46% greater heating surface. Optional Thermo-Controlled Forced Circulation offers perfect heat delivery. Radiators on each side permit "spot" heat when desired. Front Dial Console Design adds distinctive beauty to any room.

## QUAKER REACHES INTO TOMORROW TO FULFILL *today's* HEATING NEEDS

**QUAKER BURNOIL SENTINEL SERIES.** Dependability and economy of operation—low turndown and widest range of clean-burning flame . . . these features, which have long made Quaker the leader of its field, are brought to their highest degree of perfection with natural draft in the Quaker Sentinel Series. And, if desired now or at any future time, the Sentinel can be equipped with the plus advantages of Mechanical Draft. Featuring new Console-type Cabinet, there is no denying the regal beauty of the Sentinel—while its perforated Front Grille provides a plus comfort zone around the heater. Radiators make possible "spot" heat—and optional Thermo-Controlled Forced Circulation assures the most comfortable delivery of forced circulation offered on any heater.

**QUAKER BURNOIL CHALLENGER SERIES.** The Quaker Challenger offers you the foremost name in oil heating, priced to challenge comparison with heaters of unknown make—and available with features at least a year ahead of the field! Large Perforated Grille provides wide-angle heat distribution—combines the advantages of both a radiant and a circulating heater in one unit. Famous Quaker Economiser Burner, the same as used on more expensive Quaker models, assures dependable, carefree heat—and can be equipped, now or at any future time, with oil heat's greatest advancement: Mechanical Draft. This is your assurance that the Quaker Sentinel is one heater that will not become obsolete in a few years' time! Perfected Forced Circulation, too, is available if desired to make this the most complete heater in its price bracket ever offered!

**THE NEW REVOLUTIONARY  
SUPER-FORCE DRAIN PUMP!**

Every home and building with a toilet, sink or bath is a prospective customer for this *extra powerful* drain pump. It has ten times the power of ordinary drain pumps.

**Will Dislodge and Remove  
Any Obstacle Causing  
Stoppage In the Drain**

It operates on an entirely new scientific principle which gives the plunger *tremendous power*. Adding four inches to the bell and changing its shape gives super-power that quickly forces all ob-  
stacles through the drain or *pulls them up* where they can be removed.

The air, compressed in the top chamber, is forced into an even smaller space in the lower chamber—*Power is multiplied*. Many big, nationally known companies including: Du Pont, Standard Oil, Liggett & Myers, Chicago Title and Trust Co. are using it. A demonstration convinces and sells it. Retail at only \$2.95. Good profit. Write for Folder and Discounts.

# HOW TO SELL MORE Conn. Valley EXPANSIVE BITS

Describe these features  
that make good work easier

- ① CUTS SMOOTHER HOLE — WITH LESS EFFORT — because of spur on head cutting circular groove at bottom of hole.
- ② POSITIVE PULL — smooth threads on point prevent clogging; assure free, positive action.
- ③ KEENER EDGES — the extra operation of hand-sharpening enhances the cutting qualities of a steel made to our own chrome-carbon formula.
- ④ NON-SLIP CUTTER — held by clamp under tension.

## CLARK TYPE

- ① Oldest manufacturers. Use original design.
- ② Shank "necked" to assure brace jaws gripping squared section.

## WRIGHT TYPE

- ① Longer cutting edge of blade.
- ② The convenience of direct, micrometer adjustment. Cutter slip-page impossible.

In this caster there is one large surface ball that comes in contact with the floor. It is held in a cup and revolved upon a number of smaller anti-friction balls, which, in turn, move upon a cup-shaped disc of steel. Thus every movement of the large surface ball shifts all of the smaller balls upon the disc and the result is a smooth, free action in any direction.

No possibility of clogging. No amount of weight or pressure will hinder the action. The "Arme" is the ideal caster for furniture—and trunks as well. The balls are alloy steel, the ball race chrome steel well hardened and tempered. All interior parts electro galvanized. Any of the casters shown are procurable in brass, nickel or galvanized finish.

**Here Is a Line of Quality Steel  
 Stamps That Will Sell Them-  
 selves for Repeat Orders—**

Cunningham Safety Stamps, when added to Mill and Shop Supply dealer's line of stock, are an incentive for more business from old customers, in addition to the securing of new customers.

**Both Light and Heavy Bevel "Safety" Stamps** have raised the standards so high that no other stamp can compare with their safety features and their 50% to 100% longer life. The fact that they will not mushroom, spall, or bend, regardless of how long they are used or how severe the stamping may be, makes Cunningham stamps the safest and most economical stamps on the market.

**Heavy Bevel Figures**  
 (With Box)

**Safety Stamps** are identified by the registered trade mark "SAFETY" and further protected by Patent No. RE 17846 which covers the alloy steel used only in Cunningham stamps.

**Heavy Light  
 Bevel Bevel**

**Heavy Bevel Safety Stamps** are suited for use in foundries, steel mills, or any stamping operation that is hard and continuous, and in which safety is an important feature.

**Light Bevel Safety Stamps** are 35% lighter than Heavy Bevel stamps. They are the ideal stamp for light stamping work, and where neatness and perfect alignment are essential factors. This is such work as found in the stamping of machines, plates, dies, etc.

**Wedge Grip Safety Stamps** are constructed for the maximum of service and safety. The wedge shape directs the full power of the hammer blow to the center thereby giving a deeper, clearer impression. At the same time, any strains or vibrations are eliminated, giving the stamp longer life.

**Wedge Grip Figures**

Sturdy wooden boxes are furnished with all complete sets.

We also manufacture and sell inspection hammers and symbol stamps; holders and type; other steel marking devices; metal and paper stencils; and, metal checks.

# ONE OF YOUR *Biggest* PROFITS IS IN BOLTS!

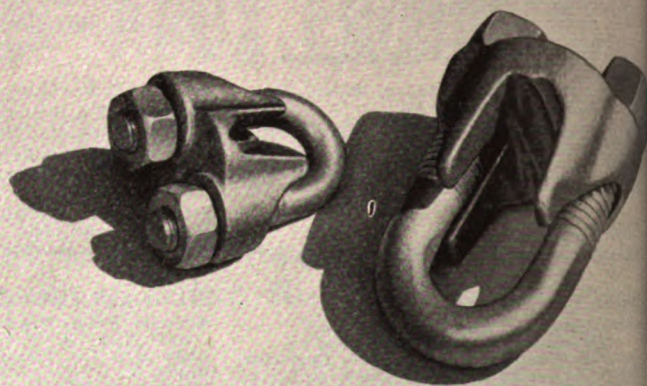

A blow on the diamond-shaped head of Lamson Cotters spreads prongs. "Efficiency" points serve as a drift pin. Lamson stock cotters conform to all Government specifications. Cotters made to order from brass, bronze, aluminum and stainless steel.

Elevator Bolts are made in four standard types. No. 1, flat head countersunk; No. 2, oval head; No. 3, flat head, with slot, four fins beneath head; No. 4, flat head, four fins beneath head. Stocked up to  $\frac{3}{8}$ -inch diameters; made with large heads to Bolt Institute standards.

Plow Bolts Nos. 3, 4, 6 and 7, made to American Standard specifications, are stocked; other types made to order. We also stock Grass Rods, Spreader Rods, Heel Bolts and Harrow Teeth.

Wire Rope Clips are made in a full range of sizes, galvanized or japanned finish. Nuts fit U-bolts accurately. Malleable iron saddles have standard "bull-dog" grip.

● Not everyone realizes that bolt and nut sales are among the most profitable in your business. *But they are!* Just figure your costs, and your margin of profit, and make comparisons with any other product you can name. To make your turn-over faster and your profit margin longer ask the Lamson & Sessions representative to tell you about the Lamson Stock List method of inventory control. And remember that Lamson products

are nationally advertised and have universal acceptance due to maintaining a reputation for highest quality over *three-quarters of a century*. You can get every fastening you sell from Lamson, for we manufacture the most complete line of bolt and nut products in this country, and pack them in the strongest, most attractive cartons ever offered to the trade.

## Your Answer to the customer who thinks all roofing sheets are alike

**W**HEN customers think that all steel roofing sheets are the same, you stand a great risk of losing their business to competition. That's where StormSeal Roofing dealers are ahead—for U·S·S StormSeal Roofing has many advantages that customers want — advantages that help you close the sale.

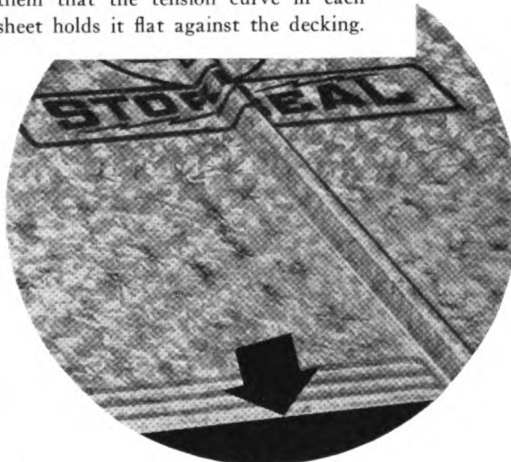

**FIRST**—show customers StormSeal's patented overlap construction. In a glance they can see why this cleverly-designed seam keeps out wind and rain—how the double drain carries off any water that might get into the lap.

**SECOND**—point to the three strong cross-crimps that keep seepage from getting through the end laps. These crimps overcome one of the most common causes of roof leaks.

**THIRD**—show customers the pressure lip in the end of each U·S·S StormSeal Sheet. It keeps the end laps firmly together. And remind them that the tension curve in each sheet holds it flat against the decking.

**FOURTH** — remind customers StormSeal is a U·S·S Galvanized Steel Roofing Sheet—the brand that has established a reputation for long life through its service on thousands of buildings all over the country.

# REMINGTON SHOTGUNS & RIFLES

## *the Choice of Sportsmen who Know their Shooting!*

Remington doesn't try to tell a man what kind of gun he should shoot. The choice is up to the customer. But we do say no man should shoot a gun that isn't the absolute top in quality in its class. Remington has never made a "cheap" gun, although many of the models are quite low in price. You can offer a customer any Remington gun and feel that you are playing square with his desire to buy a gun that will go through the years with him. Skeet and trap shooters and rifle enthusiasts who hammer away with their guns for hours at a time have long since learned that "If it's Remington . . . It's Right!" "INNER-BELTED" HOLLOW POINT 200 GRAINS

"INNER-BELTED" SOFT POINT, 180 GRAINS

### ANNOUNCING TWO NEW BULLETS!

Peters "Inner-Belted" hollow point and Peters "Inner-Belted" soft point bullets are another major Peters development for maximum ammunition performance at no increase in cost over conventional bullets. # READING BRAND CUT NAILS

## Where Nails Must Hold

Reading Cut Nails save time and money on every job... End nail waste because they drive straight and true... End lumber waste because they are blunt and non-splitting... Prevent costly renailling because they cannot work loose.

There's a Reading Cut Nail for every nailing job—flooring, finishing, roofing, etc... Recommended by Maple Flooring Mfrs. Assn. and National Oak Flooring Mfrs. Assn. for laying fine hardwood floors... Approved by National Safety Council for all principal nailing points on wood scaffolds... Excellent for green lumber and heavy planking.

Reading Cut Nails are furnished Black, Galvanized or Quenched and Tempered. Reading Brand Quenched and Tempered Cut Nails are the strongest nails it is possible to produce. ## SELL "PENNVERNON"... NOT JUST "WINDOW GLASS"

TODAY, windows are larger, more numerous, better designed than ever before. That is why it is increasingly important that they be glazed with a quality glass. The selection of Pennvernion Window Glass is the simplest way to make certain of quality glass. Pennvernion is clear, bright of surface, reflective. For a sheet glass, it exhibits a remarkable freedom from distortion. And as a result, it assures good vision. Pittsburgh Plate Glass Company, Grant Building, Pittsburgh, Pa.

# KWIK-LITE

## ASBESTOS OIL BURNER WICK

The QUALITY Kindler Wick. Manufactured to exacting specifications developed in collaboration with burner manufacturers. Made of select, long fibre asbestos yarn tightly woven for quick kindling and long service. Known to outperform and outlast ordinary kindler wick by a big margin.

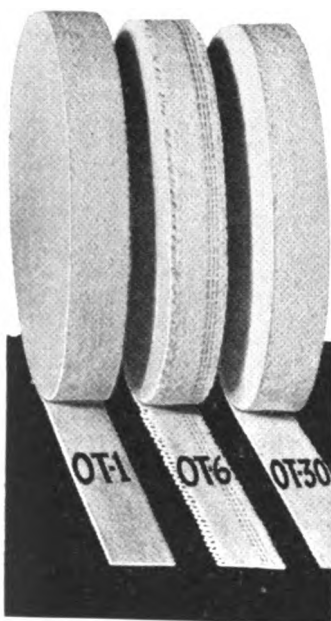

Furnished in  $\frac{7}{8}$ , 1,  $1\frac{1}{4}$  and  $1\frac{3}{4}$ " widths in three types, as follows—

OT-1 Kwik-Lite is a wick of uniform weave—made of wire-inserted asbestos yarn.

OT-6 Kwik-Lite has three heavy supporting wires with the bottom wire looped to permit free flow of fuel.

OT-30 is an exclusive Kwik-Lite style having a warp of stiff wires with a filling of soft-spun wire-reinforced asbestos yarn. This exclusive construction brings all asbestos fibres parallel for direct capillary attraction and faster lighting.

All above sizes and types are available in 100-ft. rolls and  $5\frac{1}{2}$ -ft. attractive two-color cartons. A dozen  $5\frac{1}{2}$ -ft. cartons are packed in an eye-catching two-color display carton as illustrated.

**KWIK-LITE CUSTOM-CUT STRIPS** for Range and Heater Burners Using Single Wick Kindlers.

Twelve strips of Kwik-Lite OT-30 Wick. Correct in size and length for a particular type of burner. Packed in attention-winning two-color carton.

Kwik-Lite Wicks do the job better, and they are priced to sell. Distributed by leading jobbers from coast to coast. Send for literature and attractive prices. Mention your jobber.

*Something New!*

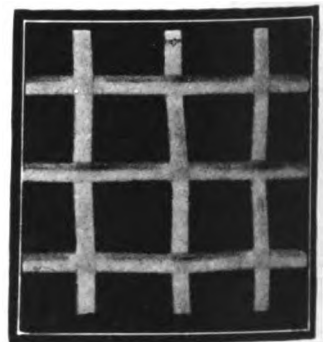

**LEKTROMESH**

MADE ELECTROLYTICALLY

Lektromesh is wire mesh without wires. It is made by depositing electrolytically any virgin metal to form a design which can then be had in continuous sheets of literally any length, in standard wire mesh widths.

It is available in varying thickness. Percentages of openings in Lektromesh are comparable to the openings in industrial grades of wire mesh. Made with 40 to 150 holes per linear inch of varying thickness and hole sizes.

Two Mesh with .105 wire. The selection of mesh depends upon the number of openings desired per linear inch, gauge of wire and kinds of metal. Standard widths from 24 to 48 inches. Standard lengths 100 feet. Special widths and meshes to specifications.

NOTE: It is impossible to list all combinations of wire cloth shown in our catalog. Send us your specifications or requirements and we will gladly give our recommendations and prices.
